Learning and development is constantly evolving, and it can be challenging to determine which trends are ideal for your organization.

What is peer to Peer learning -: Peer-to-Peer learning is a mutual learning and training strategy in which participants of the some lovely engage in collaborative learning, simply put peer to peer learning occurs when one or more learners teach other learners.

Peer learning encourage cooperation and social skills in students and help them acquire knowledge by actively supporting other student father then listening to the teacher's instructions peer learning enables students to educate their peers thought group activities and help each other understand the curichun bet here.

Peer learning in classroom can be implemented by asking older students to teach younger students. Incorporating a buddy system or asking students' to form groups and create a presentation to lecture to teacher on a specific topic.

Peer the peer learning is how student learn from and with one another student-led workshop. Study group, Peer-to-Peer learning partnership and group work are common teaching and learning activities that facilitate this.

There is always that one friend who explain the concepts extremely well just before an exam. They know exactly how to explain it and now to frame the concepts.

Is said that children learn better when they are involved in the process. Learning by doing and peers learning are part of the some equation want putting students at the forefront of the whole process will make them Independent thinkers and will also embraces their cognitive skills and ability.

It helps student develop lifelong skill in assessing and providing feedback to others and also equips them with skills be to self-assess and improve their own work. If you are interested in facilitating a team member evaluation process for group projects.

Why is peer Learning Important: - To thrive in school and society, individuals must be able to learn from others and work with them to achieve central success. Below are even more reasons why peers learning is important.

1. Team work: - per Learning fosters teamwork, Patience and better social skills. Tna cooperative peer learning environment each student's she strengths can serve to complement the group and enhance learning. Becoming skilled of working with and learning from one's peer can start at a young age in the classroom.

2. Better feedback:- Often students are not able to in "legalize the group in the their knowledge. But when learns with their peers, they can see new. I ceases for answering questions and come up with. Prayer collaborative solutions importantly. They will carry these now perspectives, as Wilson setting willingness to seek and accept feedback, with them as they progress in this education.

3. Supports Diversity:- Peer learning fosters diversity and diversity and depth in a students knowledge and opinions learning from peers of different background views, and ethnicities on environment of mutual respect gratitude, and progress.

What Are the Benefits of Peer Learning:- It's spared to number all the benefits of Peck learning but some of them new perspective, make social interaction and deepened personal learning.

New Perspectives for students:- It a student learn exclusively from the teachers, they mary onto

Gain one new perspective. Learning from there of peers can add mesons helpful perspective, nonce's, and layers to a student knowledge.

Social Interaction Makes studying from:- Bay make nature humans are social baring. We long to make connections and be part of a group. The recent elements of social interaction in peer learning can be exciting and enriching.

Teaching other's helpers students learn:- Nothing requires you be to feel confident in your ours knowledge quite like teaching what you know to some one else as mentioned, per learning can help student. Learning and seasoning and solidify their own knowledge.

Peer Learning Drawbacks:- While there are many benefits to peer learning there are also some drawbacks including and respect for feedback.

Working in Groups can be Distracting: - learning from your peers can be exciting however especially for younger student that excitement can lead to distraction. When working with their friends, some students can be easily get off track, misbehave, and for faster for focus on anything but learning student's might Not Respect the feedback of Their Peers; If a teacher gives feedback the student is make likely to listen carefully After all, the teachers is the authority in the classroom and the resident expert on the subject being fought on the others hand, if one's peer give them feedback, it's easier to disregard it.

Peer Learning Models: - Effective peer learning can take place thought many different models and strategies. Changing of the friend and true ways to encourage peer learning.

1. Procter Model - In the procter model on older or make experienced student-teacher element "younger or less experienced peed. Trading running school this might mean that student from a start his fruit artist higher grade leaved come and teach kindergarteners.

2. Discussing seminars - Disney Discussion germinate are more common at the university level. They are often held after students learn the material thought a lecture or a weekly reading.

3. Peer support Groups - Son some time referred to as private study groups, peers supper group are student-led gathering that are generally held outside of class without teacher support.

4. Fees assessment schemes - Peer assessment schemes can be common in writing campuses for instance, an AP English Language teacher might have student read are one another's essays to provide informal feeds.

5. Collaborative projects - Assing students to search on collaborative projects can serve them well for their future endeavors in the work, place and society

6. Cascading sarong - cascading group is a Learning method to which student are split into groups that and either. The progressively larger or smaller for instance. Student might be encouraged to learn about a distend topic on their own and then shortest shaver it with a partner. **Mentoring** - A mentor is someone who has sprang. County then he is when they sure that to learner Peers tutoring is a form of reentering Some time student who require extra support are player assigned of personal peer master who want one on one with them to help them succeeding.

Reciprocal Teaching - In reciprocal teaching, students This develop the skills of questioning. Redacting summarizing and Chas clarifying. They teach more another using these techniques.

Jigsaw Method - To the gigs are method of press learning students are split into group given a different topic to study. Them one student from each group is taken to from collaborative group where multiple concepts are discussed.

Interacting at with peers teaching from them, and Learning from is beneficial No matter how hard you try, learners student can sometime explain an idea to another learner I student for better, them trainers teacher, could.

This is because they can only communicate with each other at the some loved. Therefore, Peer to peer learning and interactions are critical for learning on the classroom and the works planted
